DETAILED ACTION

Applicant's amendment of the claims in the paper of 2/23/2004, is acknowledged.
Claims 7-12 are pending and at issue for examination.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7-10 and 12, drawn to a human Gax protein of Figure 3, classified in class 435, subclass 194.
- II. Claims 7-9, 11 and 12, drawn to a rat Gax protein of Figure 1, classified in class 435, subclass 194.

It is noted that many of the claims fall within both groups. The claims will be examined to the extent that they read on the elected group.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the human and rat Gax proteins each comprise chemically unrelated molecules comprising different amino acid sequences, capable of separate manufacture, use and effect.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and/or the different literature and sequence searches required for each of the Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
